

PUIDUKODA

WOOD FOR LIFE

Rose GROUPE

POUR MIEUX BÂTIR

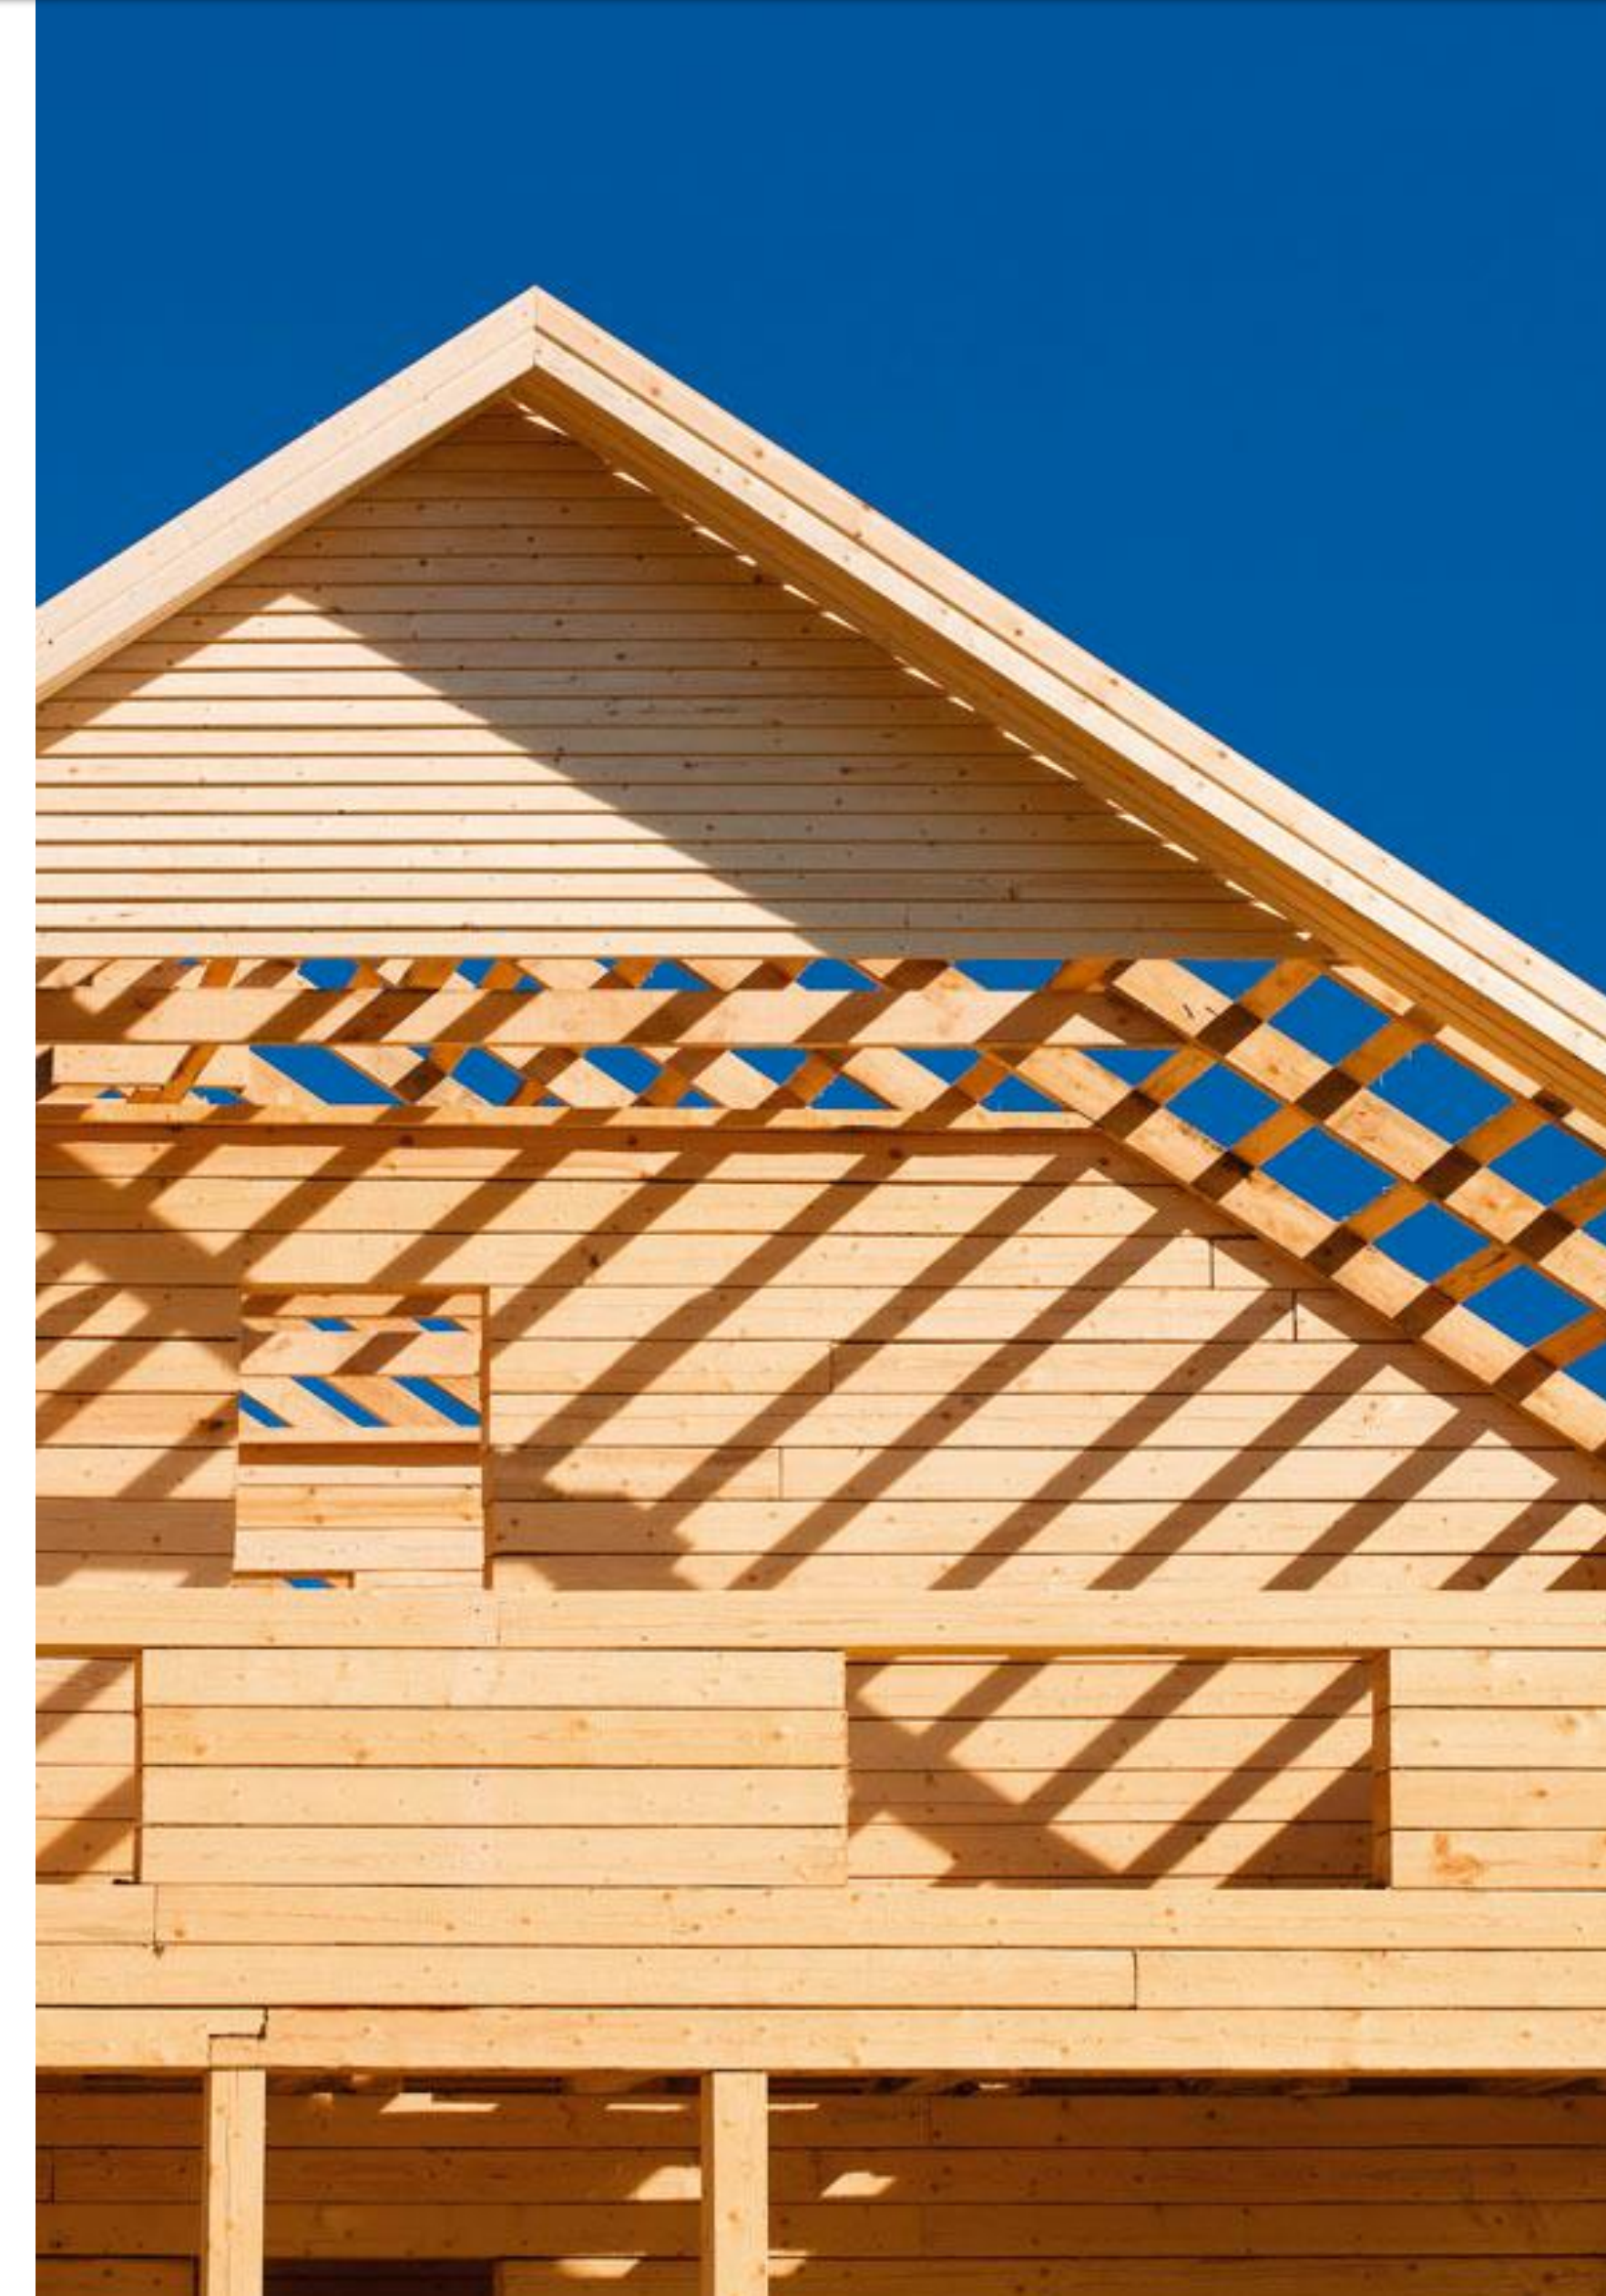

Meist

Põhitegevus on hõoveldamine ja hõoveldatud laua värvimine põhjamaisest **kuusest**, **männist** ja **termotöödeldud** materjalist.

Meil on modernsed, paindlikud ja täisautomatiseeritud hõovel-ja värviliinid.

Pakume erinevaid lisandväärtusi nagu **värvimine**, punditamine, **otsatapp** ja immutus.

Ettevõttes töötab üle 100 inimese.

hooldusvaba

Rihvel on kesktee sileda ja saepinna vahel. Sileda pinna haakuvust on parandatud peenikeste joontega puitprofiilis. Nii lähedalt kui ka distantsilt jätab rihvel vaatamängulise mulje.

Harjatud materjal toob esile kogu puidu ilu ja joonistab välja pika kasvua keerdkäigud. Pärast värvimist jääb välisvooder ilmekas ning pilkupüüdev.

Saepind on kõige levinum profiillaua töötlus. Pehme ning ebaühtlane pinnas haakub hästi värviga ja vajab seeläbi harvem hooldust.

Struktuurne profiillaud kutsub tänu oma kaunidusele hoonest mööduvaid silmapaare aina uuesti ja uuesti vaatama. Lihtne viis luua pretsedent lähiümbruse ainulaadse puitvoodriga.

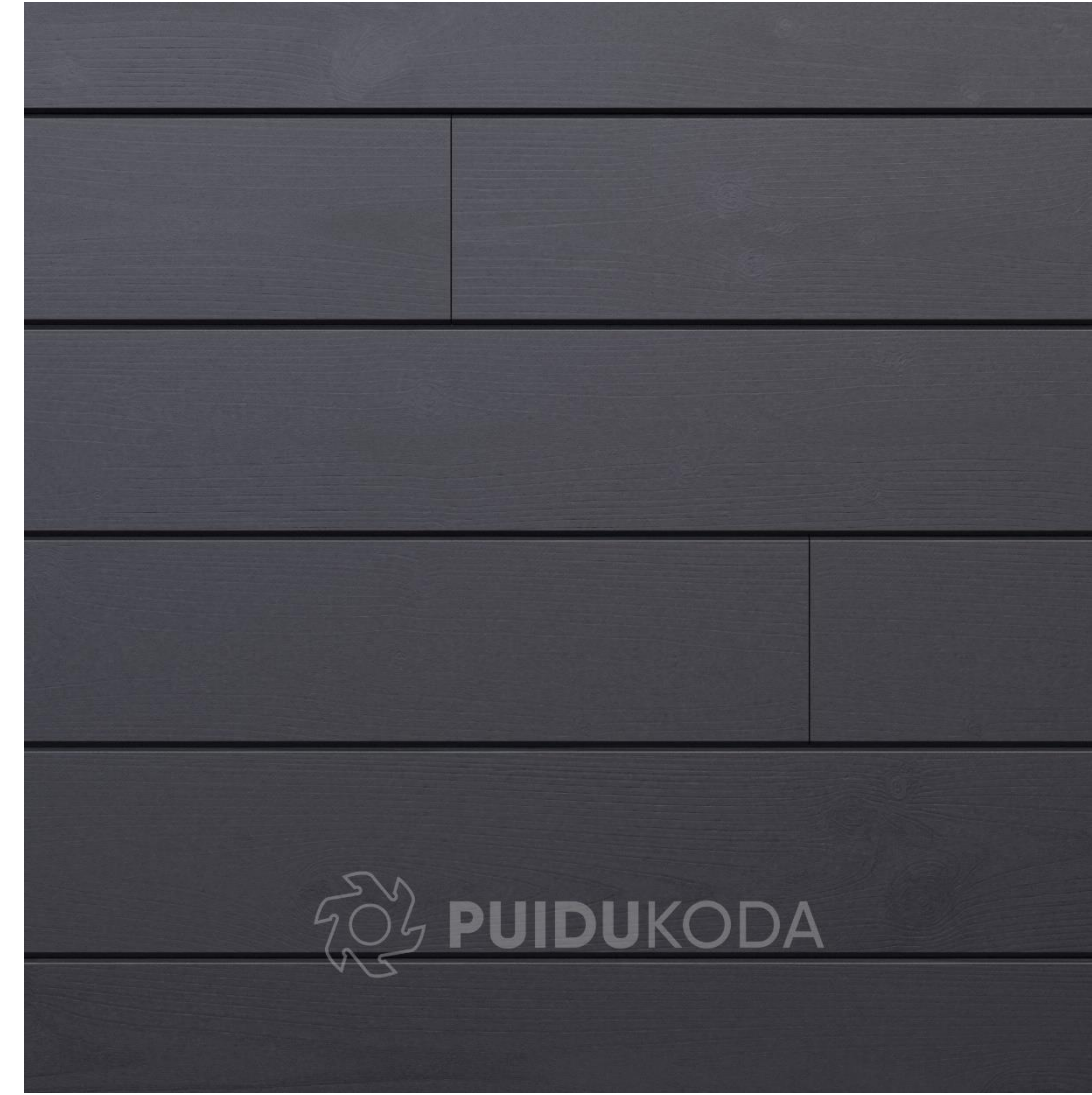

Siledapinnaline profiillaud on esteetilise ja puhta väljanägemisega. Fassaad püsib kauem puhas, sest mustusel ja tolmul pole palju pinda, kuhu kinnituda.
